

# How to decode swiss post parcel in C# and ByteScout BarCode Reader SDK

## How to decode swiss post parcel in C#

The coding tutorials are designed to help you test the features without need to write your own code. ByteScout BarCode Reader SDK is the SDK for reading of barcodes from PDF, images and live camera or video. Almost every common type like Code 39, Code 128, GS1, UPC, QR Code, Datamatrix, PDF417 and many others are supported. Supports noisy and defective images and docs. Includes optional documents splitter and merger for pdf and tiff based on found barcodess. Batch mode is supported for superior performance using multiple threads. Decoded values are easily exported to JSON, CSV, XML and to custom format. It can decode swiss post parcel in C#.

This code snippet below for ByteScout BarCode Reader SDK works best when you need to quickly decode swiss post parcel in your C# application. Just copy and paste the code into your C# application's code and follow the instruction. Enjoy writing a code with ready-to-use sample codes in C#.

Our website provides trial version of ByteScout BarCode Reader SDK for free. It also includes documentation and source code samples.

Source Code Files:

```
using System;
using System.IO;
using Bytescout.BarCodeReader;

namespace ReadSwissPostParcel
{
    class Program
    {
        const string ImageFile = "SwissPostParcel.png";

        static void Main()
        {
            Console.WriteLine("Reading barcode(s) from image {0}", Path.GetFullPath(ImageFile));

            Reader reader = new Reader();
            reader.RegistrationName = "demo";
            reader.RegistrationKey = "demo";

            // Set barcode type to find
            reader.BarcodeTypesToFind.Code128 = true; // "Swiss Post Parcel" barcode type

            /* -----
            NOTE: We can read barcodes from specific page to increase performance.
            For sample please refer to "Decoding barcodes from PDF by pages" program.
            ----- */

            // Read barcodes
            FoundBarcode[] barcodes = reader.ReadFrom(ImageFile);

            foreach (FoundBarcode barcode in barcodes)
            {
                Console.WriteLine("Found barcode with type '{0}' and value '{1}'", barcode.Type, barcode.Value);
            }

            // Cleanup
            reader.Dispose();

            Console.WriteLine("Press any key to exit..");
            Console.ReadKey();
        }
    }
}
