

How to decode bookland in VB.NET using ByteScout BarCode Reader SDK

Write code in VB.NET to decode bookland with this step-by-step tutorial

Source code documentation samples provide quick and easy way to add a required functionality into your application. ByteScout BarCode Reader SDK is the SDK for barcode decoding. Can read all popular types from Code 128, GS1, UPC and Code 39 to QR Code, Datamatrix, PDF417. Images, pdf, TIF images and live web camera are supported as input. Designed to handle documents with noise and defects. Includes optional splitter and merger for pdf and tiff based on barcodes. Batch mode is optimized for high performance with multiple threads. Decoded values can be exported to XML, JSON, CSV or into custom data format and you can use it to decode bookland with VB.NET.

VB.NET code samples for VB.NET developers help to speed up coding of your application when using ByteScout BarCode Reader SDK. In order to implement the functionality, you should copy and paste this code for VB.NET below into your code editor with your app, compile and run your application. Test VB.NET sample code examples whether they respond your needs and requirements for the project.

ByteScout free trial version is available for download from our website. It includes all these programming tutorials along with source code samples.

VB.NET - Module1.vb

```
Imports System.IO
Imports ByteScout.BarCodeReader

Module Module1

    Sub Main()

        Const imageFile As String = "Bookland.png"

        Console.WriteLine("Reading barcode(s) from image {0}",
            Path.GetFullPath(imageFile))

        Dim reader As New Reader()
        reader.RegistrationName = "demo"
        reader.RegistrationKey = "demo"

        ' Set barcode type to find
        reader.BarcodeTypesToFind.EAN13 = True ' Bookland is the same as EAN-13
barcode

        ' Read barcodes
        Dim barcodes As FoundBarcode() = reader.ReadFrom(imageFile)
```

```
    For Each barcode As FoundBarcode In barcodes
        Console.WriteLine("Found barcode with type '{0}' and value '{1}'",
barcode.Type, barcode.Value)
    Next

    ' Cleanup
    reader.Dispose()

    Console.WriteLine("Press any key to exit..")
    Console.ReadKey()

End Sub

End Module
```
