

How to add barcode to image in C# with ByteScout Barcode SDK

The tutorial below will demonstrate how to add barcode to image in C#

These sample source codes on this page below are demonstrating how to add barcode to image in C#. ByteScout Barcode SDK can add barcode to image. It can be used from C#. ByteScout Barcode SDK is the robust library (Software Development Kit) that is designed for automatic generation of high-quality barcodes for printing, electronic documents and pdf. All popular barcode types are supported from Code 39 and Code 129 to QR Code, UPC, GS1, GS-128, Datamatrix, PDF417, Maxicode and many others. Provides support for full customization of fonts, colors, output and printing sizes. Special tools are included to verify output quality and printing quality. Can add generated barcode into new or existing documents, images and PDF.

This code snippet below for ByteScout Barcode SDK works best when you need to quickly add barcode to image in your C# application. Follow the instructions from the scratch to work and copy the C# code. You can use these C# sample examples in one or many applications.

Free trial version of ByteScout Barcode SDK is available for download from our website. Get it to try other source code samples for C#.

Source Code Files:

```
using ByteScout.BarCode;

namespace AddBarcodeToImage
{
    class Program
    {
        static void Main()
        {
            // Create new barcode and register it.
            Barcode barcode = new Barcode();
            barcode.RegistrationName = "demo";
            barcode.RegistrationKey = "demo";

            // Set symbology
            barcode.Symbology = SymbologyType.PDF417;
            // Set value
            barcode.Value = "Sample barcode";

            // Place barcode at bottom-right corner of the image
            barcode.DrawToImage("wikipedia.png", -1, 400, 900, "result.png");

            // Open output file in default image viewer
            System.Diagnostics.Process.Start("result.png");
        }
    }
}
```
