

fit barcode into size in C# and ByteScout Barcode SDK

fit barcode into size in C#

Source code documentation samples provide quick and easy way to add a required functionality into your application. ByteScout Barcode SDK was made to help with fit barcode into size in C#. ByteScout Barcode SDK is the robust library (Software Development Kit) that is designed for automatic generation of high-quality barcodes for printing, electronic documents and pdf. All popular barcode types are supported from Code 39 and Code 129 to QR Code, UPC, GS1, GS-128, Datamatrix, PDF417, Maxicode and many others. Provides support for full customization of fonts, colors, output and printing sizes. Special tools are included to verify output quality and printing quality. Can add generated barcode into new or existing documents, images and PDF.

C#, code samples for C#, developers help to speed up the application development and writing a code when using ByteScout Barcode SDK. This C# sample code should be copied and pasted into your application's code editor. Then just compile and run it to see how it works. This basic programming language sample code for C# will do the whole work for you in implementing fit barcode into size in your app.

ByteScout Barcode SDK is available as free trial. You may get it from our website along with all other source code samples for C# applications.

Source Code Files:

```
using System.Diagnostics;
using ByteScout.BarCode;

namespace FitInto
{
    class Program
    {
        static void Main(string[] args)
        {
            // Create new barcode
            Barcode barcode = new Barcode();

            // Set symbology
            barcode.Symbology = SymbologyType.Code39;
            // Set value
            barcode.Value = "Sample";

            // Specify barcode size by bounds to fit into.
            // You can use any measure units.
            barcode.FitInto(5, 3, UnitOfMeasure.Inch);

            // Save barcode to image
            barcode.SaveImage("result.png");

            // Show image in default image viewer
            Process.Start("result.png");
        }
    }
}
```
