

interleaved 2 of 5 barcode in C# and ByteScout Barcode SDK

interleaved 2 of 5 barcode in C#

Here you may find thousands pre-made source code pieces for easy implementation in your own programming C# projects. Interleaved 2 of 5 barcode in C# can be implemented with ByteScout Barcode SDK. ByteScout Barcode SDK is the robust library (Software Development Kit) that is designed for automatic generation of high-quality barcodes for printing, electronic documents and pdf. All popular barcode types are supported from Code 39 and Code 129 to QR Code, UPC, GS1, GS-128, Datamatrix, PDF417, Maxicode and many others. Provides support for full customization of fonts, colors, output and printing sizes. Special tools are included to verify output quality and printing quality. Can add generated barcode into new or existing documents, images and PDF.

You will save a lot of time on writing and testing code as you may just take the code below and use it in your application. This C# sample code should be copied and pasted into your application's code editor. Then just compile and run it to see how it works. You can use these C# sample examples in one or many applications.

ByteScout Barcode SDK is available as free trial. You may get it from our website along with all other source code samples for C# applications.

C# - Program.cs

```
using System;
using System.Collections.Generic;
using System.Text;
using System.Diagnostics;

using Bytescout.BarCode;

namespace Sample
{
    class Program
    {
        static void Main(string[] args)
        {
            // Create new barcode
            Barcode barcode = new Barcode();

            // Set symbology
            barcode.Symbology = SymbologyType.I2of5;
            // Set value
            barcode.Value = "123456";

            // Save barcode to image
            barcode.SaveImage("result.png");
        }
    }
}
```

```
        // Show image in default image viewer
        Process.Start("result.png");
    }
}
```
