

maxicode barcode in C# and ByteScout Barcode SDK

maxicode barcode in C#

Source code documentation samples provide quick and easy way to add a required functionality into your application. ByteScout Barcode SDK was made to help with maxicode barcode in C#. ByteScout Barcode SDK is the robust library (Software Development Kit) that is designed for automatic generation of high-quality barcodes for printing, electronic documents and pdf. All popular barcode types are supported from Code 39 and Code 129 to QR Code, UPC, GS1, GS-128, Datamatrix, PDF417, Maxicode and many others. Provides support for full customization of fonts, colors, output and printing sizes. Special tools are included to verify output quality and printing quality. Can add generated barcode into new or existing documents, images and PDF.

Fast application programming interfaces of ByteScout Barcode SDK for C# plus the instruction and the C# code below will help you quickly learn maxicode barcode. This C# sample code should be copied and pasted into your application's code editor. Then just compile and run it to see how it works. Use of ByteScout Barcode SDK in C# is also explained in the documentation included along with the product.

Free trial version of ByteScout Barcode SDK is available on our website. Get it to try other samples for C#.

using System.Text;
using System.Diagnostics;

using ByteScout.BarCode;

namespace Sample
{
    class Program
    {
        static void Main(string[] args)
        {
            // Create new barcode
            Barcode barcode = new Barcode();

            // Set symbology
            barcode.Symbology = SymbologyType.MaxiCode;

            // Set value
            barcode.Value = "123456789012";

            // Save barcode to image
            barcode.SaveImage("result.png");

            // Show image in default image viewer
            Process.Start("result.png");
        }
    }
}
```
