

QR code barcode with binary data in C# using ByteScout Barcode SDK

Make QR code barcode with binary data in C#

:

Tutorial on how to do QR code barcode with binary data in C#

Today you are going to learn how to QR code barcode with binary data in C#. QR code barcode with binary data in C# can be implemented with ByteScout Barcode SDK. ByteScout Barcode SDK is the fully featured library to generate barcodes. Supports QR Code, Code 39, Code 128, UPC, GS1, GS-128, PDF417, Datamatrix and many other barcode types. Includes various options for barcode generation to ensure output quality, add barcodes to new or existing pdf files and images.

This rich sample source code in C# for ByteScout Barcode SDK includes the number of functions and options you should do calling the API to implement QR code barcode with binary data. This C# sample code should be copied and pasted into your application's code editor. Then just compile and run it to see how it works. Enjoy writing a code with ready-to-use sample C# codes to add QR code barcode with binary data functions using ByteScout Barcode SDK in C#.

On our website you may get trial version of ByteScout Barcode SDK for free. Source code samples are included to help you with your C# application.

Source Code Files:

Program.cs

```
using System.Diagnostics;
using System.Text;
using Bytescout.BarCode;

namespace QRCodeWithBinaryData
{
    class Program
    {
        static void Main(string[] args)
        {
            // Create Barcode component instance
            using (Barcode barcode = new Barcode())
            {
                barcode.RegistrationName = "demo";
                barcode.RegistrationKey = "demo";

                // Set barcode type
                barcode.Symbology = SymbologyType.QRCode;

                // Sample byte array to use as value
                byte[] byteArray = new byte[] { 0, 10, 11, 12, 13, 14,
            }

            // Set value by converting byte array to string
            barcode.Value = Encoding.ASCII.GetString(byteArray);

            // Save barcode image
            barcode.SaveImage("result.png");

            // Open output image in default associated application
            Process.Start("result.png");
        }
    }
}
```
