

UPCA barcode in C# using ByteScout Barcode SDK

Write code in C# to make UPCA barcode with this How-To tutorial

Here you may find thousands pre-made source code pieces for easy implementation in your own programming C# projects. ByteScout Barcode SDK was made to help with UPCA barcode in C#. ByteScout Barcode SDK is the robust SDK that generates high quality barcode images and pdf. Can generate all popular types of barcodes from QR Code, Code 39, Code 128, UPC, GS1, GS-128, PDF417, Datamatrix to more exotic barcode types. Fully customizable fonts, colors, print sizes. Includes special functions to ensure output quality, and tools for adding barcodes to new or existing pdf files and images.

This rich sample source code in C# for ByteScout Barcode SDK includes the number of functions and options you should do calling the API to implement UPCA barcode. Follow the instruction from the scratch to work and copy and paste code for C# into your editor. C# application implementation typically includes multiple stages of the software development so even if the functionality works please test it with your data and the production environment.

Free trial version of ByteScout Barcode SDK is available on our website. Get it to try other samples for C#.

C# - Program.cs

```
using System;
using System.Collections.Generic;
using System.Text;
using System.Diagnostics;

using Bytescout.BarCode;

namespace Sample
{
    class Program
    {
        static void Main(string[] args)
        {
            // Create new barcode
            Barcode barcode = new Barcode();

            // Set symbology
            barcode.Symbology = SymbologyType.UPCA;
            // Set value
            barcode.Value = "12345678901";

            // Save barcode to image
            barcode.SaveImage("result.png");
        }
    }
}
```

```
        // Show image in default image viewer
        Process.Start("result.png");
    }
}
```
