

How to generate barcode in JavaScript with ByteScout Barcode SDK

The tutorial below will demonstrate how to generate barcode in JavaScript

The coding tutorials are designed to help you test the features without need to write your own code. Want to generate barcode in your JavaScript app? ByteScout Barcode SDK is designed for it. ByteScout Barcode SDK is the robust library (Software Development Kit) that is designed for automatic generation of high-quality barcodes for printing, electronic documents and pdf. All popular barcode types are supported from Code 39 and Code 129 to QR Code, UPC, GS1, GS-128, Datamatrix, PDF417, Maxicode and many others. Provides support for full customization of fonts, colors, output and printing sizes. Special tools are included to verify output quality and printing quality. Can add generated barcode into new or existing documents, images and PDF.

You will save a lot of time on writing and testing code as you may just take the JavaScript code from ByteScout Barcode SDK for generate barcode below and use it in your application. This JavaScript sample code is all you need for your app. Just copy and paste the code, add references (if needs to) and you are all set! Enjoy writing a code with ready-to-use sample JavaScript codes.

ByteScout free trial version is available for download from our website. It includes all these programming tutorials along with source code samples.

Source Code Files:

```
var bc = WScript.CreateObject('Bytescout.BarCode.Barcode');

// set symbology to Code39
bc.Symbology = 1; // 1 = Code39 symbology type

// set barcode value to encode
bc.Value = "012345";

// Saving Code39 barcode to 'Code39.png'

bc.SaveImage ("Code39.png");

// Encoding '012345' using Aztec symbology

// set symbology to Aztec (2D)
bc.Symbology = 17; // 17 = Aztec

// set barcode value to encode
bc.Value = "012345";

// Encoding '012345' using Aztec symbology" & vbCRLF & bc.GetValueRestrictions(17), v

bc.SaveImage ("Aztec.png");

bc = null
```
