

How to add to image in VB.NET using ByteScout Barcode SDK

The tutorial shows how to add to image in VB.NET

We made thousands of pre-made source code pieces for easy implementation in your own programming projects. ByteScout Barcode SDK is the robust SDK that generates high quality barcode images and pdf. Can generate all popular types of barcodes from QR Code, Code 39, Code 128, UPC, GS1, GS-128, PDF417, Datamatrix to more exotic barcode types. Fully customizable fonts, colors, print sizes. Includes special functions to ensure output quality, and tools for adding barcodes to new or existing pdf files and images and you can use it to add to image with VB.NET.

Fast application programming interfaces of ByteScout Barcode SDK for VB.NET plus the instruction and the code below will help you quickly learn how to add to image. In order to implement the functionality, you should copy and paste this code for VB.NET below into your code editor with your app, compile and run your application. Further enhancement of the code will make it more vigorous.

Free trial version of ByteScout Barcode SDK is available for download from our website. Get it to try other source code samples for VB.NET.

VB.NET - Program.vb

```
Imports Bytescout.BarCode

Class Program
    Friend Shared Sub Main()
        ' Create new barcode and register it.
        Dim barcode As New Barcode()
        barcode.RegistrationName = "demo"
        barcode.RegistrationKey = "demo"

        ' Set symbology
        barcode.Symbology = SymbologyType.PDF417
        ' Set value
        barcode.Value = "Sample barcode"

        ' Place barcode at bottom-right corner of the image
        barcode.DrawToImage("wikipedia.png", -1, 400, 900, "result.png")

        ' Open output file in default image viewer
        System.Diagnostics.Process.Start("result.png")
    End Sub
End Class
```
