## additional caption in VB.NET using ByteScout Barcode SDK

How To: tutorial on additional caption in VB.NET

Every ByteScout tool contains example VB.NET source codes that you can find here or in the folder with installed ByteScout product. Additional caption in VB.NET can be implemented with ByteScout Barcode SDK. ByteScout Barcode SDK is the fully featured library to generate barcodes. Supports QR Code, Code 39, Code 128, UPC, GS1, GS-128, PDF417, Datamatrix and many other barcode types. Includes various options for barcode generation to ensure output quality, add barcodes to new or existing pdf files and images.

Fast application programming interfaces of ByteScout Barcode SDK for VB.NET plus the instruction and the VB.NET code below will help you quickly learn additional caption. VB.NET sample code is all you need: copy and paste the code to your VB.NET application's code editor, add a reference to ByteScout Barcode SDK (if you haven't added yet) and you are ready to go! Test VB.NET sample code examples whether they respond your needs and requirements for the project.

Trial version can be downloaded from our website. Source code samples for VB.NET and documentation are included.

Source Code Files:

```
Imports System. Drawing
Imports Bytescout.BarCode
Module Module1
    Sub Main()
        ' Create new barcode
        Dim barcode As New Barcode()
        ' Set symbology
        barcode.Symbology = SymbologyType.Codabar
        barcode.Value = "123456"
        ' Set custom additional caption
        barcode.AdditionalCaption = "Custom caption"
        ' Set additional caption font
        barcode.AdditionalCaptionFont = New Font("Comic Sans MS", 12)
        ' Set additional caption position
        barcode.AdditionalCaptionPosition = CaptionPosition.Above
        ' Save barcode to image
        barcode.SaveImage("result.png")
        ' Show image in default image viewer
        Process.Start("result.png")
    End Sub
End Module
```
