

## How to change barcode color in VB.NET using ByteScout Barcode SDK

Write code in VB.NET to change barcode color with this step-by-step tutorial

These sample source codes on this page below are demonstrating how to change barcode color in VB.NET. Want to change barcode color in your VB.NET app? ByteScout Barcode SDK is designed for it. ByteScout Barcode SDK is the robust library (Software Development Kit) that is designed for automatic generation of high-quality barcodes for printing, electronic documents and pdf. All popular barcode types are supported from Code 39 and Code 129 to QR Code, UPC, GS1, GS-128, Datamatrix, PDF417, Maxicode and many others. Provides support for full customization of fonts, colors, output and printing sizes. Special tools are included to verify output quality and printing quality. Can add generated barcode into new or existing documents, images and PDF.

The SDK samples like this one below explain how to quickly make your application do change barcode color in VB.NET with the help of ByteScout Barcode SDK. In your VB.NET project or application you may simply copy & paste the code and then run your app! Use of ByteScout Barcode SDK in VB.NET is also explained in the documentation included along with the product.

ByteScout Barcode SDK free trial version is available on our website. VB.NET and other programming languages are supported.

Source Code Files:

Module1.vb

```
Imports System.Drawing
Imports Bytescout.BarCode

Module Module1

    Sub Main()
        ' Create new barcode
        Dim barcode As New Barcode()

        ' Set symbology
        Barcode.Symbology = SymbologyType.Codabar
        ' Set value
        Barcode.Value = "123456"

        ' Set back color
        barcode.BackColor = Color.Yellow
        ' Set fore color
        barcode.ForeColor = Color.DarkGreen

        ' Save barcode to image
        Barcode.SaveImage("result.png")

        ' Show image in default image viewer
        Process.Start("result.png")

    End Sub

End Module
```
