The SDK samples like this one below explain how to quickly make your application do code 128 barcode in VB.NET with the help of ByteScout Barcode SDK. To do code 128 barcode in your VB.NET project or application you may simply copy & paste the code and then run your app! This basic programming language sample code for VB.NET will do the whole work for you in implementing code 128 barcode in your app.

ByteScout Barcode SDK is available as free trial. You may get it from our website along with all other source code samples for VB.NET applications.

VB.NET - Module1.vb

```
Imports Bytescout.BarCode
Imports System.Diagnostics

Module Module1

    Sub Main()
        ' Create new barcode
        Dim barcode As New Barcode()

        ' Set symbology
        barcode.Symbology = SymbologyType.Code128
        ' Set value
        barcode.Value = "Sample"

        ' Save barcode to image
        barcode.SaveImage("result.png")

        ' Show image in default image viewer
        Process.Start("result.png")
    End Sub

End Module
```
