

## fit into given size in VB.NET using ByteScout Barcode SDK

### fit into given size in VB.NET

Today we will explain the steps and algorithm of implementing fit into given size and how to make it work in your application. Fit into given size in VB.NET can be implemented with ByteScout Barcode SDK. ByteScout Barcode SDK is the fully featured library to generate barcodes. Supports QR Code, Code 39, Code 128, UPC, GS1, GS-128, PDF417, Datamatrix and many other barcode types. Includes various options for barcode generation to ensure output quality, add barcodes to new or existing pdf files and images.

The SDK samples like this one below explain how to quickly make your application do fit into given size in VB.NET with the help of ByteScout Barcode SDK. To do fit into given size in your VB.NET project or application you may simply copy & paste the code and then run your app! Enjoy writing a code with ready-to-use sample VB.NET codes to add fit into given size functions using ByteScout Barcode SDK in VB.NET.

ByteScout Barcode SDK free trial version is available for download from our website. Free trial also includes programming tutorials along with source code samples.

VB.NET - Program.vb

```
Imports System.Diagnostics
Imports Bytescout.BarCode

Class Program
    Friend Shared Sub Main(args As String())
        ' Create new barcode
        Dim barcode As New Barcode()

        ' Set symbology
        barcode.Symbology = SymbologyType.Code39
        ' Set value
        barcode.Value = "Sample"

        ' Specify barcode size by bounds to fit into.
        ' You can use any measure units.
        barcode.FitInto(5, 3, UnitOfMeasure.Inch)

        ' Save barcode to image
        barcode.SaveImage("result.png")

        ' Show image in default image viewer
        Process.Start("result.png")
    End Sub
End Class
```
