

options code128 in VB.NET with ByteScout Barcode SDK

How to code options code128 in VB.NET: How-To tutorial

The documentation is designed to help you to implement the features on your side. ByteScout Barcode SDK was made to help with options code128 in VB.NET. ByteScout Barcode SDK is the robust library (Software Development Kit) that is designed for automatic generation of high-quality barcodes for printing, electronic documents and pdf. All popular barcode types are supported from Code 39 and Code 129 to QR Code, UPC, GS1, GS-128, Datamatrix, PDF417, Maxicode and many others. Provides support for full customization of fonts, colors, output and printing sizes. Special tools are included to verify output quality and printing quality. Can add generated barcode into new or existing documents, images and PDF.

Fast application programming interfaces of ByteScout Barcode SDK for VB.NET plus the instruction and the VB.NET code below will help you quickly learn options code128. This VB.NET sample code should be copied and pasted into your application's code editor. Then just compile and run it to see how it works. You can use these VB.NET sample examples in one or many applications.

ByteScout Barcode SDK free trial version is available for download from our website. Free trial also includes programming tutorials along with source code samples.

Source Code Files:

```
Imports ByteScout.BarCode

Module Module1

    Sub Main()
        ' Create new barcode
        Dim barcode As New Barcode()

        ' Set symbology
        barcode.Symbology = SymbologyType.Code128
        ' Set value
        barcode.Value = "123456"

        ' Set custom additional caption
        barcode.Options.Code128Alphabet = Code128Alphabet.C

        ' Save barcode to image
        barcode.SaveImage("result.png")

        ' Show image in default image viewer
        Process.Start("result.png")
    End Sub

End Module
```
