

postnet in VB.NET and ByteScout Barcode SDK

How to code postnet in VB.NET: How-To tutorial

Source code documentation samples provide quick and easy way to add a required functionality into your application. ByteScout Barcode SDK helps with postnet in VB.NET. ByteScout Barcode SDK is the robust library (Software Development Kit) that is designed for automatic generation of high-quality barcodes for printing, electronic documents and pdf. All popular barcode types are supported from Code 39 and Code 129 to QR Code, UPC, GS1, GS-128, Datamatrix, PDF417, Maxicode and many others. Provides support for full customization of fonts, colors, output and printing sizes. Special tools are included to verify output quality and printing quality. Can add generated barcode into new or existing documents, images and PDF.

VB.NET, code samples for VB.NET, developers help to speed up the application development and writing a code when using ByteScout Barcode SDK. This VB.NET sample code should be copied and pasted into your application's code editor. Then just compile and run it to see how it works. Test VB.NET sample code examples whether they respond your needs and requirements for the project.

ByteScout Barcode SDK free trial version is available for download from our website. Free trial also includes programming tutorials along with source code samples.

VB.NET - Module1.vb

```
Imports ByteScout.BarCode

Module Module1

    Sub Main()
        ' Create new barcode
        Dim barcode As New Barcode()

        ' Set symbology
        barcode.Symbology = SymbologyType.Postnet
        ' Set value
        barcode.Value = "12345"

        ' Save barcode to image
        barcode.SaveImage("result.png")

        ' Show image in default image viewer
        Process.Start("result.png")
    End Sub

End Module
```
