

## USPS tray label in VB.NET and ByteScout Barcode SDK

### USPS tray label in VB.NET

Every ByteScout tool contains example VB.NET source codes that you can find here or in the folder with installed ByteScout product. ByteScout Barcode SDK was made to help with USPS tray label in VB.NET. ByteScout Barcode SDK is the robust library (Software Development Kit) that is designed for automatic generation of high-quality barcodes for printing, electronic documents and pdf. All popular barcode types are supported from Code 39 and Code 129 to QR Code, UPC, GS1, GS-128, Datamatrix, PDF417, Maxicode and many others. Provides support for full customization of fonts, colors, output and printing sizes. Special tools are included to verify output quality and printing quality. Can add generated barcode into new or existing documents, images and PDF.

The SDK samples like this one below explain how to quickly make your application do USPS tray label in VB.NET with the help of ByteScout Barcode SDK. VB.NET sample code is all you need: copy and paste the code to your VB.NET application's code editor, add a reference to ByteScout Barcode SDK (if you haven't added yet) and you are ready to go! Enjoy writing a code with ready-to-use sample VB.NET codes to add USPS tray label functions using ByteScout Barcode SDK in VB.NET.

ByteScout Barcode SDK is available as free trial. You may get it from our website along with all other source code samples for VB.NET applications.

Source Code Files:

## Module1.vb

```
Imports ByteScout.BarCode

Module Module1

    Sub Main()
        ' Create new barcode
        Dim barcode As New Barcode()

        ' Set symbology
        barcode.Symbology = SymbologyType.USPSTrayLabel

        ' Set value
        barcode.Value = "1234567890"

        ' Save barcode to image
        barcode.SaveImage("result.png")

        ' Show image in default image viewer
        Process.Start("result.png")
    End Sub

End Module
```
