

How to command line use in VBScript with ByteScout Barcode SDK

How to code in VBScript to command line use with this step-by-step tutorial

These sample source codes on this page below are demonstrating how to command line use in VBScript. What is ByteScout Barcode SDK? It is the fully featured library to generate barcodes. Supports QR Code, Code 39, Code 128, UPC, GS1, GS-128, PDF417, Datamatrix and many other barcode types. Includes various options for barcode generation to ensure output quality, add barcodes to new or existing pdf files and images. It can help you to command line use in your VBScript application.

This rich sample source code in VBScript for ByteScout Barcode SDK includes the number of functions and options you should do calling the API to command line use. Just copy and paste the code into your VBScript application's code and follow the instruction. Test VBScript sample code examples whether they respond your needs and requirements for the project.

Trial version of ByteScout Barcode SDK can be downloaded for free from our website. It also includes source code samples for VBScript and other programming languages.

VBScript - GenerateQRCode.vbs

```
if WScript.Arguments.Count < 1 Then
    WScript.Echo "Set barcode value as command line parameter: " & vbCRLF & vbCRLF &
"GenerateQRCode.vbs "
    WScript.Quit 0
End If

' Create and activate QRCode instance
Set barcode = CreateObject("Bytescout.BarCode.Barcode")
barcode.RegistrationName = "demo"
barcode.RegistrationKey = "demo"

' Set barcode type
barcode.Symbology = 16 ' 16 = QRCode symbology

' Set barcode value from the command line parameter
barcode.Value = WScript.Arguments(0)

' Save barcode image to file
barcode.SaveImage("result.png")

Set barcode = Nothing
```

VBScript - run.bat

```
REM running from the command line  
cscript.exe GenerateQRCode.vbs "ABCDEFGHJKLMNOP1234567890"  
pause
```
