

monochrome bitmap in VBScript using ByteScout Barcode SDK

How to code monochrome bitmap in VBScript: How-To tutorial

The sample source codes on this page will demonstrate you how to make monochrome bitmap in VBScript. ByteScout Barcode SDK was made to help with monochrome bitmap in VBScript. ByteScout Barcode SDK is the robust library (Software Development Kit) that is designed for automatic generation of high-quality barcodes for printing, electronic documents and pdf. All popular barcode types are supported from Code 39 and Code 129 to QR Code, UPC, GS1, GS-128, Datamatrix, PDF417, Maxicode and many others. Provides support for full customization of fonts, colors, output and printing sizes. Special tools are included to verify output quality and printing quality. Can add generated barcode into new or existing documents, images and PDF.

You will save a lot of time on writing and testing code as you may just take the code below and use it in your application. To do monochrome bitmap in your VBScript project or application you may simply copy & paste the code and then run your app! Test VBScript sample code examples whether they respond your needs and requirements for the project.

ByteScout Barcode SDK free trial version is available for download from our website. Free trial also includes programming tutorials along with source code samples.

VBScript - MonochromeBitmap.vbs

```
Set bc = CreateObject("Bytescout.BarCode.Barcode")

' set barcode type (symbology)
bc.Symbology = 16 ' 16 = QR Code

' set monochrome output
bc.ProduceMonochromeImages = True

' set barcode value to encode
bc.Value = "012345"

' save image to file
bc.SaveImage "result.bmp"

Set bc = Nothing

' Open the output file in default app
Set shell = CreateObject("WScript.Shell")
shell.Run "result.bmp", 1, false
Set shell = Nothing
```
