

# How to set 2 captions for barcode in VBScript and ByteScout Barcode SDK

Write code in VBScript to set 2 captions for barcode with this step-by-step tutorial

On this page you will learn from code samples for programming in VBScript. Writing of the code to set 2 captions for barcode in VBScript can be done by developers of any level using ByteScout Barcode SDK. ByteScout Barcode SDK is the robust SDK that generates high quality barcode images and pdf. Can generate all popular types of barcodes from QR Code, Code 39, Code 128, UPC, GS1, GS-128, PDF417, Datamatrix to more exotic barcode types. Fully customizable fonts, colors, print sizes. Includes special functions to ensure output quality, and tools for adding barcodes to new or existing pdf files and images and you can use it to set 2 captions for barcode with VBScript.

VBScript code samples for VBScript developers help to speed up coding of your application when using ByteScout Barcode SDK. Just copy and paste the code into your VBScript application's code and follow the instruction. Code testing will allow the function to be tested and work properly with your data.

ByteScout free trial version is available for download from our website. It includes all these programming tutorials along with source code samples.

VBScript - HelloWorld.vbs

```
Set bc = CreateObject("Bytescout.BarCode.Barcode")

' set symbology to Code39
bc.Symbology = 1 ' 1 = Code39 symbology type

' set barcode value to encode
bc.Value = "012345"

bc.AdditionalCaption = "2nd caption"

bc.SaveImage "Code39.png"

' Open the output file in default app
Set shell = CreateObject("WScript.Shell")
shell.Run "code39.png", 1, false
Set shell = Nothing

Set bc = Nothing
```
