How to add barcode to image with barcode sdk in C# and ByteScout Barcode Suite

Continuous learning is a crucial part of computer science and this tutorial shows how to add barcode to image with barcode sdk in C#

Sample source code below will display you how to manage a complex task like add barcode to image with barcode sdk in C#. ByteScout Barcode Suite: the set that includes three different SDK products to generate barcodes, read barcodes and read and write spreadsheets: Barcode SDK, Barcode Reader SDK and Spreadsheet SDK. It can add barcode to image with barcode sdk in C#.

This prolific sample source code in C# for ByteScout Barcode Suite contains various functions and other necessary options you should do calling the API to add barcode to image with barcode sdk. IF you want to implement the functionality, just copy and paste this code for C# below into your code editor with your app, compile and run your application. If you want to use these C# sample examples in one or many applications then they can be used easily.

ByteScout provides the free trial version of ByteScout Barcode Suite along with the documentation and source code samples.

Source Code Files:

Program.cs

```csharp
using Bytescout.BarCode;

namespace AddBarcodeToImage
{
    class Program
    {
        static void Main()
        {
            // Create new barcode and register it.
            Barcode barcode = new Barcode();
                barcode.RegistrationName = "demo";
                barcode.RegistrationKey = "demo";

            // Set symbology
            barcode.Symbology = SymbologyType.PDF417;
            // Set value
            barcode.Value = "Sample barcode";

            // Place barcode at bottom-right corner of the image
                barcode.DrawToImage("wikipedia.png", -1, 400, 900, "result.png"

            // Open output file in default image viewer
            System.Diagnostics.Process.Start("result.png");
        }
    }
}
```
