

How to copy range with spreadsheet sdk in C# and ByteScout Barcode Suite

Learn to code in C# to copy range with spreadsheet sdk with this step-by-step tutorial

Source code documentation samples give simple and easy method to install a needed feature into your application. ByteScout Barcode Suite is the bundle that provides 3 SDK products to generate barcodes (Barcode SDK), read barcodes (Barcode Reader SDK) and read and write spreadsheets (Spreadsheet SDK). It can be applied to copy range with spreadsheet sdk using C#.

The SDK samples given below describe how to quickly make your application do copy range with spreadsheet sdk in C# with the help of ByteScout Barcode Suite. Simply copy and paste in your C# project or application you and then run your app! If you want to use these C# sample examples in one or many applications then they can be used easily.

Trial version of ByteScout Barcode Suite is available for free. Source code samples are included to help you with your C# app.

Source Code Files:

```
using System.Diagnostics;
using System.IO;
using Bytescout.Spreadsheet;

namespace CopyRange
{
    class Program
    {
        static void Main(string[] args)
        {
            // Open spreadsheet from file
            Spreadsheet document = new Spreadsheet();
            document.LoadFromFile("example.xls");

            // Get first worksheet
            Worksheet worksheet = document.Workbook.Worksheets[0];

            // Select cell range
            Range range = worksheet.Range("A2:B8");

            // Copy range to C10 cell
            range.CopyTo("C10");

            // Delete output file if exists
            if (File.Exists("changed.xls"))
            {
                File.Delete("changed.xls");
            }

            // Save document
            document.SaveAs("changed.xls");

            // Close spreadsheet
            document.Close();

            // Open generated XLS document in default program
            Process.Start("changed.xls");
        }
    }
}
```
