How to decode numly barcode with barcode reader sdk in C# using ByteScout Barcode Suite

How to write a robust code in C# to decode numly barcode with barcode reader sdk with this step-by-step tutorial

Source code documentation samples give simple and easy method to install a needed feature into your application. ByteScout Barcode Suite can decode numly barcode with barcode reader sdk. It can be applied from C#. ByteScout Barcode Suite is the bundle that privides 3 SDK products to generate barcodes (Barcode SDK), read barcodes (Barcode Reaer SDK) and read and write spreadsheets (Spreadsheet SDK).

The SDK samples given below describe how to quickly make your application do decode numly barcode with barcode reader sdk in C# with the help of ByteScout Barcode Suite. IF you want to implement the functionality, just copy and paste this code for C# below into your code editor with your app, compile and run your application. Complete and detailed tutorials and documentation are available along with installed ByteScout Barcode Suite if you'd like to learn more about the topic and the details of the API.

You can download free trial version of ByteScout Barcode Suite from our website to see and try many others source code samples for C#.

Program.cs

```csharp
using System;
using System.IO;
using Bytescout.BarCodeReader;

namespace ReadNumly
{
    class Program
    {
        const string ImageFile = "Numly.png";

        static void Main()
        {
            Console.WriteLine("Reading barcode(s) from image {0}", Path.GetFullPath(Im

            Reader reader = new Reader();
            reader.RegistrationName = "demo";
                      reader.RegistrationKey = "demo";

            // Set barcode type to find
            reader.BarcodeTypesToFind.Code39 = true; // "Numly" barcode type is the sar

            /* -----------------------------------------------------------------
            NOTE: We can read barcodes from specific page to increase performance.
            For sample please refer to "Decoding barcodes from PDF by pages" program.
            ------------------------------------------------------------------ */

            // Read barcodes
            FoundBarcode[] barcodes = reader.ReadFrom(ImageFile);

            foreach (FoundBarcode barcode in barcodes)
            {
                Console.WriteLine("Found barcode with type '{0}' and value '{1}'", bard
            }

                      // Cleanup
                      reader.Dispose();

            Console.WriteLine("Press any key to exit..");
            Console.ReadKey();
        }
    }
}
