

How to generate gs1 databar stacked omnidirectional barcode with barcode sdk in C# using ByteScout Barcode Suite

How to write a robust code in C# to generate gs1 databar stacked omnidirectional barcode with barcode sdk with this step-by-step tutorial

On this page you will learn from code samples for programming in C#. Writing of the code to generate gs1 databar stacked omnidirectional barcode with barcode sdk in C# can be executed by programmers of any level using ByteScout Barcode Suite. ByteScout Barcode Suite is the set that includes three different SDK products to generate barcodes, read barcodes and read and write spreadsheets: Barcode SDK, Barcode Reader SDK and Spreadsheet SDK and you can use it to generate gs1 databar stacked omnidirectional barcode with barcode sdk with C#.

Want to save time? You will save a lot of time on writing and testing code as you may just take the C# code from ByteScout Barcode Suite for generate gs1 databar stacked omnidirectional barcode with barcode sdk below and use it in your application. Follow the instructions from scratch to work and copy the C# code. Enjoy writing a code with ready-to-use sample C# codes.

You can download free trial version of ByteScout Barcode Suite from our website to see and try many others source code samples for C#.

Source Code Files:

Program.cs

```
using System;
using System.Collections.Generic;
using System.Text;
using System.Diagnostics;

using Bytescout.BarCode;

namespace Sample
{
    class Program
    {
        static void Main(string[] args)
        {
            // Create new barcode
            Barcode barcode = new Barcode();

            // Set symbology
            barcode.Symbology = SymbologyType.GS1_DataBar_Stacked_Omnidirectional;
            // Set value
            barcode.Value = "00034567890125";

            // Save barcode to image
            barcode.SaveImage("result.png");

            // Show image in default image viewer
            Process.Start("result.png");
        }
    }
}
```
