

hidden formula with spreadsheet sdk in C# and ByteScout Barcode Suite

hidden formula with spreadsheet sdk in C#

This page helps you to learn from code samples for programming in C#. ByteScout Barcode Suite was made to help with hidden formula with spreadsheet sdk in C#. ByteScout Barcode Suite is the set that includes three different SDK products to generate barcodes, read barcodes and read and write spreadsheets: Barcode SDK, Barcode Reader SDK and Spreadsheet SDK.

C# code snippet like this for ByteScout Barcode Suite works best when you need to quickly implement hidden formula with spreadsheet sdk in your C# application. If you want to know how it works, then this C# sample code should be copied and pasted into your application's code editor. Then just compile and run it. This basic programming language sample code for C# will do the whole work for you in implementing hidden formula with spreadsheet sdk in your app.

Our website gives free trial version of ByteScout Barcode Suite. It includes all these source code samples with the purpose to assist you with your C# application implementation.

Source Code Files:

```
using System.Diagnostics;
using System.IO;
using Bytescout.Spreadsheet;

namespace HiddenFormula
{
    class Program
    {
        static void Main(string[] args)
        {
            // Open spreadsheet from file
            Spreadsheet document = new Spreadsheet();
            document.LoadFromFile("example.xls");

            // Get first worksheet
            Worksheet worksheet = document.Workbook.Worksheets[0];

            // Hide formula in B9 cell
            worksheet.Cell("B9").HiddenFormula = true;
            // Protect the worksheet with password
            worksheet.Protect("password");

            // Delete output file if exists
            if (File.Exists("changed.xls"))
            {
                File.Delete("changed.xls");
            }

            // Save document
            document.SaveAs("changed.xls");

            // Close spreadsheet
            document.Close();

            // Open generated XLS document in default program
            Process.Start("changed.xls");
        }
    }
}
```
