

optical product barcode with barcode sdk in C# with ByteScout Barcode Suite

Build optical product barcode with barcode sdk in C#

:

Step-by-step instructions on how to do optical product barcode with barcode sdk in C#

Writing of the code to optical product barcode with barcode sdk in C# can be done by developers of any level using ByteScout Barcode Suite. Optical product barcode with barcode sdk in C# can be applied with ByteScout Barcode Suite. ByteScout Barcode Suite is the set that includes three different SDK products to generate barcodes, read barcodes and read and write spreadsheets: Barcode SDK, Barcode Reader SDK and Spreadsheet SDK.

If you want to quickly learn then these fast application programming interfaces of ByteScout Barcode Suite for C# plus the guideline and the C# code below will help you quickly learn optical product barcode with barcode sdk. Just copy and paste this C# sample code to your C# application's code editor, add a reference to ByteScout Barcode Suite (if you haven't added yet) and you are ready to go! Enjoy writing a code with ready-to-use sample C# codes to implement optical product barcode with barcode sdk using ByteScout Barcode Suite.

ByteScout Barcode Suite free trial version is available for download from our website. Free trial also includes programming tutorials along with source code samples.

Source Code Files:

Program.cs

```
using System;
using System.Collections.Generic;
using System.Text;
using System.Diagnostics;

using Bytescout.BarCode;

namespace Sample
{
    class Program
    {
        static void Main(string[] args)
        {
            // Create new barcode
            Barcode barcode = new Barcode();

            // Set symbology
            barcode.Symbology = SymbologyType.OpticalProduct;

            // Set value
            barcode.Value = "123456789";

            // Save barcode to image
            barcode.SaveImage("result.png");

            // Show image in default image viewer
            Process.Start("result.png");
        }
    }
}
```
