

## How to read formula from cell with spreadsheet sdk in C# and ByteScout Barcode Suite

Learning is essential in computer world and the tutorial below will demonstrate how to read formula from cell with spreadsheet sdk in C#

On this page you will learn from code samples for programming in C#. Writing of the code to read formula from cell with spreadsheet sdk in C# can be executed by programmers of any level using ByteScout Barcode Suite. ByteScout Barcode Suite can read formula from cell with spreadsheet sdk. It can be applied from C#. ByteScout Barcode Suite is the set that includes three different SDK products to generate barcodes, read barcodes and read and write spreadsheets: Barcode SDK, Barcode Reader SDK and Spreadsheet SDK.

This prolific sample source code in C# for ByteScout Barcode Suite contains various functions and other necessary options you should do calling the API to read formula from cell with spreadsheet sdk. Just copy and paste the code into your C# application's code and follow the instructions. Applying C# application mostly includes various stages of the software development so even if the functionality works please test it with your data and the production environment.

ByteScout Barcode Suite free trial version is available on our website. C# and other programming languages are supported.

Source Code Files:

```
using System;
using System.Collections.Generic;
using System.Text;
using Bytescout.Spreadsheet;

namespace HelloWorld
{
    class Program
    {
        static void Main(string[] args)
        {
            // Create new Spreadsheet
            Spreadsheet document = new Spreadsheet();
            document.LoadFromFile("sample.xls");

            // get the very first worksheet
            Worksheet sheet = document.Worksheet(0);

            Console.WriteLine("reading total price formula from cell B5");
            // we use .Formula value to read from the B5 cell
            Console.WriteLine("Formula in B5 cell is: " + sheet.Cell("B5").Formula);
            Console.WriteLine("\npres any key to continue");
            Console.ReadKey();
        }
    }
}
```
