

How to add images advanced with spreadsheet sdk in VB.NET with ByteScout Barcode Suite

Step-by-step tutorial on how to add images advanced with spreadsheet sdk in VB.NET

On this page you will learn from code samples for programming in VB.NET. Writing of the code to add images advanced with spreadsheet sdk in VB.NET can be executed by programmers of any level using ByteScout Barcode Suite. ByteScout Barcode Suite: the bundle that provides 3 SDK products to generate barcodes (Barcode SDK), read barcodes (Barcode Reader SDK) and read and write spreadsheets (Spreadsheet SDK). It can add images advanced with spreadsheet sdk in VB.NET.

This prolific sample source code in VB.NET for ByteScout Barcode Suite contains various functions and other necessary options you should do calling the API to add images advanced with spreadsheet sdk. Simply copy and paste in your VB.NET project or application you and then run your app! Enjoy writing a code with ready-to-use sample codes in VB.NET.

You can download free trial version of ByteScout Barcode Suite from our website with this and other source code samples for VB.NET.

Source Code Files:

```

Imports System.Collections.Generic
Imports System.Diagnostics
Imports System.IO
Imports System.Text
Imports Bytescout.Spreadsheet
Imports Bytescout.Spreadsheet.MSODrawing

Namespace AddImages
    Class Program
        Friend Shared Sub Main(args As String())
            ' Create spreadsheet
            Dim doc As New Spreadsheet()
            ' Add worksheet
            Dim worksheet As Worksheet = doc.Worksheets.Add()

            ' Put an image to "C3" cell
            Dim shape As PictureShape = worksheet.Pictures.Add(2, 2, "image")

            ' Make the picture "floating". It will be not moved if you move
            shape.PlacementType = Placement.FreeFloating

            ' Make the picture brighter
            shape.Brightness = 0.8F

            ' Put second image to "K11" cell
            shape = worksheet.Pictures.Add(10, 10, "image2.jpg")

            ' Make the picture bound to the cell. It will be moved along w
            shape.PlacementType = Placement.Move

            ' Crop 10% from left and right side of the image
            shape.CropFromLeft = 0.1F
            shape.CropFromRight = 0.1F

            ' Delete output file if exists
            If File.Exists("output.xls") Then
                File.Delete("output.xls")
            End If

            ' Save document
            doc.SaveAs("output.xls")

            ' Close spreadsheet
            doc.Close()

            ' Open generated XLS document in default application
            Process.Start("output.xls")

            doc.Dispose()
        End Sub
    End Class
End Namespace
