

How to copy range with spreadsheet sdk in VB.NET and ByteScout Barcode Suite

How to write a robust code in VB.NET to copy range with spreadsheet sdk with this step-by-step tutorial

Quickly learn how to copy range with spreadsheet sdk in VB.NET with this sample source code. ByteScout Barcode Suite is the set that includes three different SDK products to generate barcodes, read barcodes and read and write spreadsheets: Barcode SDK, Barcode Reader SDK and Spreadsheet SDK. It can be applied to copy range with spreadsheet sdk using VB.NET.

The following code snippet for ByteScout Barcode Suite works best when you need to quickly copy range with spreadsheet sdk in your VB.NET application. Just copy and paste the code into your VB.NET application's code and follow the instructions. Want to see how it works with your data then code testing will allow the function to be tested and work properly.

ByteScout Barcode Suite free trial version is available on our website. VB.NET and other programming languages are supported.

Source Code Files:

```
Imports System.Diagnostics
Imports System.IO
Imports Bytescout.Spreadsheet

Class Program
    Friend Shared Sub Main(args As String())
        ' Open spreadsheet from file
        Dim document As New Spreadsheet()
        document.LoadFromFile("example.xls")

        ' Get first worksheet
        Dim worksheet As Worksheet = document.Workbook.Worksheets(0)

        ' Select cell range
        Dim range As Range = worksheet.Range("A2:B8")

        ' Copy range to C10 cell
        range.CopyInto("C10")

        ' Delete output file if exists
        If File.Exists("changed.xls") Then
            File.Delete("changed.xls")
        End If

        ' Save document
        document.SaveAs("changed.xls")

        ' Close spreadsheet
        document.Close()

        ' Open generated XLS document in default program
        Process.Start("changed.xls")
    End Sub
End Class
```
