

How to export to list with spreadsheet sdk in VB.NET with ByteScout Barcode Suite

Step-by-step tutorial on how to export to list with spreadsheet sdk in VB.NET

The sample source code below will teach you how to export to list with spreadsheet sdk in VB.NET. What is ByteScout Barcode Suite? It is the bundle that provides 3 SDK products to generate barcodes (Barcode SDK), read barcodes (Barcode Reader SDK) and read and write spreadsheets (Spreadsheet SDK). It can help you to export to list with spreadsheet sdk in your VB.NET application.

The following code snippet for ByteScout Barcode Suite works best when you need to quickly export to list with spreadsheet sdk in your VB.NET application. Simply copy and paste in your VB.NET project or application you and then run your app! Applying VB.NET application mostly includes various stages of the software development so even if the functionality works please test it with your data and the production environment.

If you want to try other source code samples then the free trial version of ByteScout Barcode Suite is available for download from our website. Just try other source code samples for VB.NET.

Source Code Files:

```
Module Module1

    Sub Main()
        Dim inputFile As String = "ListOfPlanetsSpreadsheet.xls"

        'Open and load spreadsheet
        Dim spreadsheet As Spreadsheet = New Spreadsheet()
        spreadsheet.LoadFromFile(inputFile)

        'Get the data from the spreadsheet
        Dim planets(10, 2) As String
        spreadsheet.ExportToList(planets)

        'Close spreadsheet
        spreadsheet.Close()

        'Display array
        Dim planetsArray(,) As String = planets
        For i As Integer = 0 To planetsArray.GetLength(0) - 1
            For j As Integer = 0 To planets.GetLength(1) - 1
                Console.Write(planetsArray(i, j) + " ")
            Next
            Console.WriteLine()
        Next

        'Pause
        Console.ReadLine()

    End Sub

End Module
