

How to generate aztec barcode with binary data with barcode sdk in VB.NET with ByteScout Barcode Suite

Continuous learning is a crucial part of computer science and this tutorial shows how to generate aztec barcode with binary data with barcode sdk in VB.NET

The code displayed below will guide you to install an VB.NET app to generate aztec barcode with binary data with barcode sdk. Want to generate aztec barcode with binary data with barcode sdk in your VB.NET app? ByteScout Barcode Suite is designed for it. ByteScout Barcode Suite is the bundle that provides 3 SDK products to generate barcodes (Barcode SDK), read barcodes (Barcode Reader SDK) and read and write spreadsheets (Spreadsheet SDK).

The following code snippet for ByteScout Barcode Suite works best when you need to quickly generate aztec barcode with binary data with barcode sdk in your VB.NET application. Just copy and paste the code into your VB.NET application's code and follow the instructions. Want to see how it works with your data then code testing will allow the function to be tested and work properly.

You can download free trial version of ByteScout Barcode Suite from our website with this and other source code samples for VB.NET.

Source Code Files:

```
Imports System.Diagnostics
Imports System.Text
Imports Bytescout.BarCode

Class Program
    Friend Shared Sub Main(args As String())
        ' Create Barcode component instance
        Using barcode As New Barcode()
            barcode.RegistrationName = "demo"
            barcode.RegistrationKey = "demo"

            ' Set barcode type
            barcode.Symbology = SymbologyType.Aztec
            ' Force binary mode
            barcode.Options.AztecCompactionMode = AztecCompactionMode.Binary

            ' Sample byte array to use as value
            Dim byteArray As Byte() = New Byte() {0, 10, 11, 12, 13, 14, 15, &Hff}

            ' Set value by converting byte array to string
            barcode.Value = Encoding.[Default].GetString(byteArray)

            ' Save barcode image
            barcode.SaveImage("result.png")

            ' Open output image in default associated application
            Process.Start("result.png")
        End Using
    End Sub
End Class
```
