Source Code Files:

```
Imports System.Diagnostics
Imports System.Text
Imports ByteScout.BarCode

Class Program
    Friend Shared Sub Main(args As String())
        ' Create Barcode component instance
        Using barcode As New Barcode()
            barcode.RegistrationName = "demo"
            barcode.RegistrationKey = "demo"

            ' Set barcode type
            barcode.Symbology = SymbologyType.PDF417
            ' Force binary mode
            barcode.Options.PDF417CompactionMode = PDF417CompactionMode.Binary

            ' Sample byte array to use as value
            Dim byteArray As Byte() = New Byte() {0, 10, 11, 12, 13, 14, 15, &HFF}

            ' Set value by converting byte array to string
            barcode.Value = Encoding.Default.GetString(byteArray)

            ' Save barcode image
            barcode.SaveImage("result.png")

            ' Open output image in default associated application
            Process.Start("result.png")
        End Using
    End Sub
End Class
```
