How to convert PDF to text from URL for PDF to text API in VB.NET with ByteScout Cloud API Server

Follow this simple tutorial to learn convert PDF to text from URL to have PDF to text API in VB.NET

These simple tutorials explain the code material for beginners and advanced programmers who are using VB.NET. ByteScout Cloud API Server helps with PDF to text API in VB.NET. ByteScout Cloud API Server is the ready to deploy Web API Server that can be deployed in less than thirty minutes into your own in-house Windows server (no Internet connection is required to process data!) or into private cloud server. Can store data on in-house local server based storage or in Amazon AWS S3 bucket. Processing data solely on the server using built-in ByteScout powered engine, no cloud services are used to process your data!.

This simple and easy to understand sample source code in VB.NET for ByteScout Cloud API Server contains different functions and options you should do calling the API to implement PDF to text API. This VB.NET sample code can be used by copying and pasting into your project. Once done, just compile your project and click Run. Further improvement of the code will make it more robust.

Trial version of ByteScout is available for free download from our website. This and other source code samples for VB.NET and other programming languages are available.
