

How to convert CSV to PDF from URL for CSV to PDF API in cURL and ByteScout Cloud API Server

Follow this simple tutorial to learn convert CSV to PDF from URL to have CSV to PDF API in cURL

The easy to understand coding guides help you check the features without any need to write your own code. ByteScout Cloud API Server was designed to assist CSV to PDF API in cURL. ByteScout Cloud API Server is API server that is ready to use and can be installed and deployed in less than 30 minutes on your own Windows server or server in a cloud. It can save data and files on your local server-based file storage or in Amazon AWS S3 storage. Data is processed solely on the API server and is powered by ByteScout engine, no cloud services or Internet connection is required for data processing..

Use the code displayed below in your application to save a lot of time on writing and testing code. This cURL sample code can be used by copying and pasting into your project. Once done, just compile your project and click Run. This basic programming language sample code for cURL will do the whole work for you in implementing CSV to PDF API in your app.

Trial version of ByteScout is available for free download from our website. This and other source code samples for cURL and other programming languages are available.

Source Code Files:

ConvertCsvToPdfFromUrl.cmd

```
@echo off

:: Path of the cURL executable
set CURL="curl.exe"

:: Direct URL of source CSV file.
set SOURCE_FILE_URL=https://bytescout-com.s3.amazonaws.com/files/demo-files/cloud-api/

:: Result PDF file name
set RESULT_FILE_NAME=result.pdf

:: Please NOTE: In this sample we're assuming Cloud Api Server is hosted at "https://localhost:8080/"
:: If it's not then please replace this with your hosting url.

:: Prepare URL for `CSV To PDF` API call
set QUERY="https://localhost/pdf/convert/from/csv?name=%RESULT_FILE_NAME%&pages=%PAGES%"

:: Perform request and save response to a file
%CURL% -# -XGET %QUERY% >response.json

:: Display the response
type response.json

:: Use any convenient way to parse JSON response and get URL of generated file(s)

echo.
pause
```
