# How to copy range with spreadsheet sdk in C# and ByteScout Data Extraction Suite

## How to write a robust code in C# to copy range with spreadsheet sdk with this step-by-step tutorial

This sample source code below will display you how to copy range with spreadsheet sdk in C#. ByteScout Data Extraction Suite is the bundle that includes three SDK tools for data extraction from PDF, scans, images and from spreadsheets: PDF Extractor SDK, Data Extraction SDK, Barcode Reader SDK. It can copy range with spreadsheet sdk in C#.

The SDK samples given below describe how to quickly make your application do copy range with spreadsheet sdk in C# with the help of ByteScout Data Extraction Suite. Simply copy and paste in your C# project or application you and then run your app! Complete and detailed tutorials and documentation are available along with installed ByteScout Data Extraction Suite if you'd like to learn more about the topic and the details of the API.

If you want to try other source code samples then the free trial version of ByteScout Data Extraction Suite is available for download from our website. Just try other source code samples for C#.

# Source Code Files:

Program.cs

```csharp
using System.Diagnostics;
using System.IO;
using Bytescout.Spreadsheet;

namespace CopyRange
{
    class Program
    {
        static void Main(string[] args)
        {
            // Open spreadsheet from file
            Spreadsheet document = new Spreadsheet();
            document.LoadFromFile("example.xls");

            // Get first worksheet
            Worksheet worksheet = document.Workbook.Worksheets[0];

            // Select cell range
            Range range = worksheet.Range("A2:B8");

            // Copy range to C10 cell
            range.CopyInto("C10");

            // Delete output file if exists
            if (File.Exists("changed.xls"))
            {
                File.Delete("changed.xls");
            }

            // Save document
            document.SaveAs("changed.xls");

            // Close spreadsheet
            document.Close();

            // Open generated XLS document in default program
            Process.Start("changed.xls");
        }
    }
}
```
