

How to decode jan 13 barcode with barcode reader sdk in C# using ByteScout Data Extraction Suite

If you want to learn more then this tutorial will show how to decode jan 13 barcode with barcode reader sdk in C#

On this page you will learn from code samples for programming in C#. Writing of the code to decode jan 13 barcode with barcode reader sdk in C# can be executed by programmers of any level using ByteScout Data Extraction Suite. Want to decode jan 13 barcode with barcode reader sdk in your C# app? ByteScout Data Extraction Suite is designed for it. ByteScout Data Extraction Suite is the set that includes 3 SDK products for data extraction from PDF, scans, images and from spreadsheets: PDF Extractor SDK, Data Extraction SDK, Barcode Reader SDK.

The following code snippet for ByteScout Data Extraction Suite works best when you need to quickly decode jan 13 barcode with barcode reader sdk in your C# application. Just copy and paste the code into your C# application's code and follow the instructions. Applying C# application mostly includes various stages of the software development so even if the functionality works please test it with your data and the production environment.

You can download free trial version of ByteScout Data Extraction Suite from our website to see and try many others source code samples for C#.

Source Code Files:

Program.cs

```
using System;
using System.IO;
using Bytescout.BarCodeReader;

namespace ReadJAN13
{
    class Program
    {
        const string ImageFile = "JAN13.png";

        static void Main()
        {
            Console.WriteLine("Reading barcode(s) from image {0}", Path.GetFullPath(ImageFile));

            Reader reader = new Reader();
            reader.RegistrationName = "demo";
            reader.RegistrationKey = "demo";

            // Set barcode type to find
            reader.BarcodeTypesToFind.EAN13 = true; // "JAN-13" barcode type is the same as EAN13

            /* -----
            NOTE: We can read barcodes from specific page to increase performance.
            For sample please refer to "Decoding barcodes from PDF by pages" program.
            ----- */

            // Read barcodes
            FoundBarcode[] barcodes = reader.ReadFrom(ImageFile);

            foreach (FoundBarcode barcode in barcodes)
            {
                Console.WriteLine("Found barcode with type '{0}' and value '{1}'", barcode.Type, barcode.Value);
            }

            // Cleanup
            reader.Dispose();

            Console.WriteLine("Press any key to exit..");
            Console.ReadKey();
        }
    }
}
```
