How to decode page by page from tiff with barcode reader sdk in C# using ByteScout Data Extraction Suite

If you want to learn more then this tutorial will show how to decode page by page from tiff with barcode reader sdk in C#

On this page you will learn from code samples for programming in C#.Writing of the code to decode page by page from tiff with barcode reader sdk in C# can be executed by programmers of any level using ByteScout Data Extraction Suite. ByteScout Data Extraction Suite: the set that includes 3 SDK products for data extraction from PDF, scans, images and from spreadsheets: PDF Extractor SDK, Data Extraction SDK, Barcode Reader SDK. It can decode page by page from tiff with barcode reader sdk in C#.

This prolific sample source code in C# for ByteScout Data Extraction Suite contains various functions and other necessary options you should do calling the API to decode page by page from tiff with barcode reader sdk. This C# sample code is all you need for your app. Just copy and paste the code, add references (if needs to) and you are all set! This basic programming language sample code for C# will do the whole work for you to decode page by page from tiff with barcode reader sdk.

ByteScout provides the free trial version of ByteScout Data Extraction Suite along with the documentation and source code samples.

Source Code Files:

Program.cs

```csharp
using System;
using Bytescout.BarCodeReader;

namespace BarcodesFromTIFF
{
    class Program
    {
        static void Main()
        {
            Reader reader = new Reader();
            reader.RegistrationName = "demo";
            reader.RegistrationKey = "demo";

            // Limit search to 1-dimensional barcodes only (exclude 2D barcodes to spe
            // Change to barcodeReader.BarcodeTypesToFind.SetAll() to scan for all sup
            // or select specific type, e.g. barcodeReader.BarcodeTypesToFind.PDF417 =
            reader.BarcodeTypesToFind.All1D = true;

            // Input filename
            string fileName = "multipage.tif";

            // Pages from which barcodes to be fetched
            int[] readFromPages = { 1, 2, 4, 6 };

            foreach (var pageNo in readFromPages)
            {
                Console.WriteLine("\n\nReading barcodes from TIFF page {0}...", pageNo)

                // Decoding barcodes from TIFF on page-by-page basis, instead of readi
                FoundBarcode[] barcodes = reader.ReadFrom(fileName, (pageNo - 1));

                // Found results
                foreach (FoundBarcode barcode in barcodes)
                {
                    Console.WriteLine("Found Barcode, Type: '{0}', Value: '{1}', Posit
                        barcode.Type, barcode.Value, barcode.Rect);
                }
            }

            // Cleanup
            reader.Dispose();

            Console.WriteLine();
            Console.WriteLine("Press any key to continue.");
            Console.ReadKey();
        }
    }
}
