

How to decode swiss post parcel barcode with barcode reader sdk in C# and ByteScout Data Extraction Suite

How to write a robust code in C# to decode swiss post parcel barcode with barcode reader sdk with this step-by-step tutorial

Every ByteScout tool includes simple example C# source codes that you can get here or in the folder with installed ByteScout product. ByteScout Data Extraction Suite is the bundle that includes three SDK tools for data extraction from PDF, scans, images and from spreadsheets: PDF Extractor SDK, Data Extraction SDK, Barcode Reader SDK. It can decode swiss post parcel barcode with barcode reader sdk in C#.

The following code snippet for ByteScout Data Extraction Suite works best when you need to quickly decode swiss post parcel barcode with barcode reader sdk in your C# application. This C# sample code is all you need for your app. Just copy and paste the code, add references (if needs to) and you are all set! Enjoy writing a code with ready-to-use sample codes in C#.

ByteScout Data Extraction Suite free trial version is available on our website. C# and other programming languages are supported.

Source Code Files:

```
using System;
using System.IO;
using Bytescout.BarCodeReader;

namespace ReadSwissPostParcel
{
    class Program
    {
        const string ImageFile = "SwissPostParcel.png";

        static void Main()
        {
            Console.WriteLine("Reading barcode(s) from image {0}", Path.GetFullPath(ImageFile));

            Reader reader = new Reader();
            reader.RegistrationName = "demo";
            reader.RegistrationKey = "demo";

            // Set barcode type to find
            reader.BarcodeTypesToFind.Code128 = true; // "Swiss Post Parcel" barcode type

            /* -----
            NOTE: We can read barcodes from specific page to increase performance.
            For sample please refer to "Decoding barcodes from PDF by pages" program.
            ----- */

            // Read barcodes
            FoundBarcode[] barcodes = reader.ReadFrom(ImageFile);

            foreach (FoundBarcode barcode in barcodes)
            {
                Console.WriteLine("Found barcode with type '{0}' and value '{1}'", barcode.Type, barcode.Value);
            }

            // Cleanup
            reader.Dispose();

            Console.WriteLine("Press any key to exit..");
            Console.ReadKey();
        }
    }
}
```
