

## font style in cell with spreadsheet sdk in C# and ByteScout Data Extraction Suite

### Learn font style in cell with spreadsheet sdk in C#

Every ByteScout tool includes sample C# source codes that you can find here or in the folder with installed ByteScout product. ByteScout Data Extraction Suite helps with font style in cell with spreadsheet sdk in C#. ByteScout Data Extraction Suite is the bundle that includes three SDK tools for data extraction from PDF, scans, images and from spreadsheets: PDF Extractor SDK, Data Extraction SDK, Barcode Reader SDK.

Save time on writing and testing code by using the code below and use it in your application. If you want to know how it works, then this C# sample code should be copied and pasted into your application's code editor. Then just compile and run it. Want to see how it works with your data then code testing will allow the function to be tested and work properly.

ByteScout Data Extraction Suite free trial version is available for download from our website. Free trial also includes programming tutorials along with source code samples.

### Source Code Files:

Program.cs

```

using System;
using System.Collections.Generic;
using System.Drawing;
using System.Text;
using Bytescout.Spreadsheet;
using System.Diagnostics;
using System.IO;

namespace HelloWorld
{
    class Program
    {
        static void Main(string[] args)
        {
            // Create new Spreadsheet
            Spreadsheet document = new Spreadsheet();

            // Add new worksheet
            Worksheet worksheet = document.Workbook.Worksheets.Add("Sheet1");

            // Apply rich text formatting
            worksheet.Cell(0, 0).Value = "Arial Italic Bold, Size=23";
            worksheet.Cell(0, 0).Font = new Font("Arial", 23, FontStyle.Bold | FontSty

            // delete output file if exists already
            if (File.Exists("FontStyleForCell.xls")){
                File.Delete("FontStyleForCell.xls");
            }

            // Save document
            document.SaveAs("FontStyleForCell.xls");

            // open generated document
            Process.Start("FontStyleForCell.xls");
        }
    }
}

```
