

## hidden formula with spreadsheet sdk in C# using ByteScout Data Extraction Suite

### hidden formula with spreadsheet sdk in C#

Every ByteScout tool includes sample C# source codes that you can find here or in the folder with installed ByteScout product. ByteScout Data Extraction Suite helps with hidden formula with spreadsheet sdk in C#. ByteScout Data Extraction Suite is the set that includes 3 SDK products for data extraction from PDF, scans, images and from spreadsheets: PDF Extractor SDK, Data Extraction SDK, Barcode Reader SDK.

The below SDK samples describe how to quickly make your application do hidden formula with spreadsheet sdk in C# with the help of ByteScout Data Extraction Suite. Follow the steps-by-step instructions from the scratch to work and copy and paste code for C# into your editor. Check these C# sample code examples to see if they acknowledge to your needs and requirements for the project.

ByteScout Data Extraction Suite is available as a free trial. You may get it from our website along with all other source code samples for C# applications.

## Source Code Files:

```

using System.Diagnostics;
using System.IO;
using Bytescout.Spreadsheet;

namespace HiddenFormula
{
    class Program
    {
        static void Main(string[] args)
        {
            // Open spreadsheet from file
            Spreadsheet document = new Spreadsheet();
            document.LoadFromFile("example.xls");

            // Get first worksheet
            Worksheet worksheet = document.Workbook.Worksheets[0];

            // Hide formula in B9 cell
            worksheet.Cell("B9").HiddenFormula = true;
            // Protect the worksheet with password
            worksheet.Protect("password");

            // Delete output file if exists
            if (File.Exists("changed.xls"))
            {
                File.Delete("changed.xls");
            }

            // Save document
            document.SaveAs("changed.xls");

            // Close spreadsheet
            document.Close();

            // Open generated XLS document in default program
            Process.Start("changed.xls");
        }
    }
}

```
