Source Code Files:

Program.cs

```csharp
using System;
using System.Collections.Generic;
using System.Text;
using System.Diagnostics;
using Bytescout.Spreadsheet;
using System.IO;

namespace HelloWorld
{
    class Program
    {
        static void Main(string[] args)
        {
            // Create new Spreadsheet
            Spreadsheet document = new Spreadsheet();
            document.LoadFromFile("Sample.xls");

            // Get worksheet by name
            Worksheet worksheet = document.Workbook.Worksheets.ByName("Sheet1");

            // Check dates
            for (int i = 0; i < 4; i++)
            {
                // Set current cell
                Cell currentCell = worksheet.Cell(i, 0);

                DateTime date = currentCell.ValueAsDateTime;

                // Write Date
                Console.WriteLine("{0}", date.ToShortDateString());
            }

            // Close document
            document.Close();

            // Write message
            Console.Write("Press any key to continue...");

            // Wait user input
            Console.ReadKey();

        }
    }
}
```
