

How to use unicode text with spreadsheet sdk in C# with ByteScout Data Extraction Suite

If you want to learn more then this tutorial will show how to use unicode text with spreadsheet sdk in C#

On this page you will learn from code samples for programming in C#. Writing of the code to use unicode text with spreadsheet sdk in C# can be executed by programmers of any level using ByteScout Data Extraction Suite. ByteScout Data Extraction Suite is the bundle that includes three SDK tools for data extraction from PDF, scans, images and from spreadsheets: PDF Extractor SDK, Data Extraction SDK, Barcode Reader SDK. It can be applied to use unicode text with spreadsheet sdk using C#.

The following code snippet for ByteScout Data Extraction Suite works best when you need to quickly use unicode text with spreadsheet sdk in your C# application. Follow the instructions from scratch to work and copy the C# code. If you want to use these C# sample examples in one or many applications then they can be used easily.

ByteScout provides the free trial version of ByteScout Data Extraction Suite along with the documentation and source code samples.

using Bytescout.Spreadsheet;
using System.Diagnostics;
using System.IO;

namespace Sample
{
    class Program
    {
        static void Main(string[] args)
        {
            // Create new Spreadsheet
            Spreadsheet document = new Spreadsheet ();

            // Move page
            Worksheet worksheet = document.Workbook.Worksheets.Add();

            // Set unicode text
            worksheet.Cell(0, 0).Value = "???";

            // delete output file if exists already
            if (File.Exists("Output.xls")){
                File.Delete("Output.xls");
            }

            // Save document
            document.SaveAs("Output.xls");

            // Close Spreadsheet
            document.Close();

            // open generated XLS document in default program
            Process.Start("Output.xls");
        }
    }
}
```
