### Source Code Files:

Module1.vb

```

Imports System.Drawing
Imports Bytescout.PDFExtractor

Namespace AddImageStampInPDF

    Class Program

        Shared Sub Main(ByVal args As String())

            Dim inputFile As String = ".\Invoice.pdf"
            Dim outputFile As String = ".\Invoice_Stamped.pdf"
            Dim stampImageFile As String = ".\stamp_image.png"

            Using stamper As New Stamper("demo", "demo")

                ' Optionally make the image background transparent
                ' stamper.MakeStampImageTransparent = true

                Using image As Image = Image.FromFile(stampImageFile)

                    ' Get image size in PDF units
                    Dim imageSizeInPoints As.SizeF = stamper.GetImageSizeInPoints(image)

                    Dim Rectangle = New RectangleF(440, 370, imageSizeInPoints.Width /
                    stamper.Stamp(inputFile, outputFile, image, Rectangle, 0, -1)

                End Using

            End Using

            ' Open result file in default associated application (for demo purposes)
            Process.Start(outputFile)

        End Sub

    End Class

End Namespace

```
