

## How to change cell width and height with spreadsheet sdk in VB.NET and ByteScout Data Extraction Suite

If you want to learn more then this tutorial will show how to change cell width and height with spreadsheet sdk in VB.NET

We made thousands of pre-made source code pieces for easy implementation in your own programming projects. What is ByteScout Data Extraction Suite? It is the set that includes 3 SDK products for data extraction from PDF, scans, images and from spreadsheets: PDF Extractor SDK, Data Extraction SDK, Barcode Reader SDK. It can help you to change cell width and height with spreadsheet sdk in your VB.NET application.

Want to quickly learn? This fast application programming interfaces of ByteScout Data Extraction Suite for VB.NET plus the guidelines and the code below will help you quickly learn how to change cell width and height with spreadsheet sdk. IF you want to implement the functionality, just copy and paste this code for VB.NET below into your code editor with your app, compile and run your application. If you want to use these VB.NET sample examples in one or many applications then they can be used easily.

You can download free trial version of ByteScout Data Extraction Suite from our website to see and try many others source code samples for VB.NET.

Source Code Files:

Module1.vb

```
Imports Bytescout.Spreadsheet
Imports System.IO
Imports System.Diagnostics

Module Module1

    Sub Main()
        Dim document As New Spreadsheet()

        Dim worksheet As Worksheet = document.Workbook.Worksheets.Add()

        worksheet.Rows(1).Height = 100

        ' remove output file if already exists
        If File.Exists("Output.xls") Then
            File.Delete("Output.xls")
        End If

        ' Save document
        document.SaveAs("Output.xls")

        ' Close Spreadsheet
        document.Close()

        ' open in default spreadsheets viewer/editor
        Process.Start("Output.xls")
    End Sub

End Module
```
