

## How to export to dataset with spreadsheet sdk in VB.NET with ByteScout Data Extraction Suite

Learning is essential in computer world and the tutorial below will demonstrate how to export to dataset with spreadsheet sdk in VB.NET

This sample source code below will display you how to export to dataset with spreadsheet sdk in VB.NET. ByteScout Data Extraction Suite is the bundle that includes three SDK tools for data extraction from PDF, scans, images and from spreadsheets: PDF Extractor SDK, Data Extraction SDK, Barcode Reader SDK. It can export to dataset with spreadsheet sdk in VB.NET.

These VB.NET code samples for VB.NET guide developers to speed up coding of the application when using ByteScout Data Extraction Suite. IF you want to implement the functionality, just copy and paste this code for VB.NET below into your code editor with your app, compile and run your application. Enjoy writing a code with ready-to-use sample codes in VB.NET.

ByteScout Data Extraction Suite free trial version is available on our website. VB.NET and other programming languages are supported.

Source Code Files:

```
Module Module1

    Sub Main()
        Dim inputFile As String = "PeriodicTableOfElementsSpreadsheet.xls"

        'Open and load spreadsheet
        Dim spreadsheet = New Spreadsheet()
        spreadsheet.LoadFromFile(inputFile)

        'Get the data from the spreadsheet
        Dim ds As DataSet = spreadsheet.ExportToDataSet()

        'Close spreadsheet
        spreadsheet.Close()

        'Display data in first datatable of dataset
        Dim dt As DataTable = ds.Tables(0)
        Console.WriteLine("Displaying contents of first datatable")
        For i As Integer = 0 To dt.Rows.Count - 1
            For j As Integer = 0 To dt.Columns.Count - 1

                Console.Write(dt.Rows(i)(j) + " ")
            Next
            Console.WriteLine()
        Next

        'Pause
        Console.ReadLine()
    End Sub

End Module
```
