

## How to export to datatable with spreadsheet sdk in VB.NET using ByteScout Data Extraction Suite

Continuous learning is a crucial part of computer science and this tutorial shows how to export to datatable with spreadsheet sdk in VB.NET

We made thousands of pre-made source code pieces for easy implementation in your own programming projects. ByteScout Data Extraction Suite can export to datatable with spreadsheet sdk. It can be applied from VB.NET. ByteScout Data Extraction Suite is the bundle that includes three SDK tools for data extraction from PDF, scans, images and from spreadsheets: PDF Extractor SDK, Data Extraction SDK, Barcode Reader SDK.

The SDK samples given below describe how to quickly make your application do export to datatable with spreadsheet sdk in VB.NET with the help of ByteScout Data Extraction Suite. IF you want to implement the functionality, just copy and paste this code for VB.NET below into your code editor with your app, compile and run your application. This basic programming language sample code for VB.NET will do the whole work for you to export to datatable with spreadsheet sdk.

Trial version of ByteScout Data Extraction Suite is available for free. Source code samples are included to help you with your VB.NET app.

Source Code Files:

```
Module Module1

    Sub Main()
        Dim inputFile As String = "PeriodicTableOfElementsSpreadsheet.xls"

        'Open and load spreadsheet
        Dim spreadsheet = New Spreadsheet()
        spreadsheet.LoadFromFile(inputFile)

        'Get the data from the spreadsheet
        Dim dt As DataTable = spreadsheet.ExportToDataTable()

        'Close spreadsheet
        spreadsheet.Close()

        'Display data in datatable
        For i As Integer = 0 To dt.Rows.Count - 1
            For j As Integer = 0 To dt.Columns.Count - 1
                Console.Write(dt.Rows(i)(j) + " ")
            Next
            Console.WriteLine()
        Next

        'Pause
        Console.ReadLine()
    End Sub

End Module
```
