Source Code Files:

Program.vb

```vb
Imports Bytescout.PDFExtractor

Class Program
        Friend Shared Sub Main(args As String())

                ' Create Bytescout.PDFExtractor.TextExtractor instance
                Dim extractor As New TextExtractor()
                extractor.RegistrationName = "demo"
                extractor.RegistrationKey = "demo"

                ' Load sample PDF document
                extractor.LoadDocumentFromFile(".\sample2.pdf")

                ' Get page count
                Dim pageCount As Integer = extractor.GetPageCount()

                For i As Integer = 0 To pageCount - 1
                        Dim fileName As String = "page" & i & ".txt"

                        ' Save extracted page text to file
                        extractor.SavePageTextToFile(i, fileName)
                Next

                ' Cleanup
                extractor.Dispose()

                ' Open result file in default associated application (for demo purposes
                System.Diagnostics.Process.Start(".\page1.txt")

        End Sub
End Class
```
