

ocr with mean dataset with pdf extractor sdk in VB.NET and ByteScout Data Extraction Suite

Simple tutorial on how to do ocr with mean dataset with pdf extractor sdk in VB.NET

The samples of source code documentation give a quick and simple method to apply a required functionality into your application. ByteScout Data Extraction Suite was made to help with ocr with mean dataset with pdf extractor sdk in VB.NET. ByteScout Data Extraction Suite is the bundle that includes three SDK tools for data extraction from PDF, scans, images and from spreadsheets: PDF Extractor SDK, Data Extraction SDK, Barcode Reader SDK.

The below SDK samples describe how to quickly make your application do ocr with mean dataset with pdf extractor sdk in VB.NET with the help of ByteScout Data Extraction Suite. Follow the steps-by-step instructions from the scratch to work and copy and paste code for VB.NET into your editor. VB.NET application implementation mostly involves various stages of the software development so even if the functionality works please check it with your data and the production environment.

If you want to try other samples for VB.NET then free trial version of ByteScout Data Extraction Suite is available on our website.

' (!) You can use new OCRAnalyzer class to find an optimal set of image preproc
' filters for your specific document.
' See "OCR Analyser" example.

' Save extracted text to file
extractor.SaveTextToFile("output.txt")

' Cleanup
extractor.Dispose()

' Open output file in default associated application
System.Diagnostics.Process.Start("output.txt")

End Sub

End Class
