

## How to read formula from cell with spreadsheet sdk in VB.NET and ByteScout Data Extraction Suite

If you want to learn more then this tutorial will show how to read formula from cell with spreadsheet sdk in VB.NET

On this page you will learn from code samples for programming in VB.NET. Writing of the code to read formula from cell with spreadsheet sdk in VB.NET can be executed by programmers of any level using ByteScout Data Extraction Suite. Want to read formula from cell with spreadsheet sdk in your VB.NET app? ByteScout Data Extraction Suite is designed for it. ByteScout Data Extraction Suite is the set that includes 3 SDK products for data extraction from PDF, scans, images and from spreadsheets: PDF Extractor SDK, Data Extraction SDK, Barcode Reader SDK.

The SDK samples given below describe how to quickly make your application do read formula from cell with spreadsheet sdk in VB.NET with the help of ByteScout Data Extraction Suite. Simply copy and paste in your VB.NET project or application you and then run your app! Further improvement of the code will make it more robust.

All these programming tutorials along with source code samples and ByteScout free trial version are available for download from our website.

Source Code Files:

## Module1.vb

```
Imports Bytescout.Spreadsheet
Imports System.IO

Module Module1

    Sub Main()
        ' Create new Spreadsheet
        Dim document As New Spreadsheet()
        document.LoadFromFile("sample.xls")

        ' get the very first worksheet
        Dim sheet As Worksheet = document.Worksheet(0)

        Console.WriteLine("reading total price formula from cell B5")
        ' we use .Formula value to read from the B5 cell
        Console.WriteLine("Formula in B5 cell is: " + sheet.Cell("B5").Formula)
        Console.WriteLine("\npress any key to continue")
        Console.ReadKey()
    End Sub

End Module
```
