

## How to read ods (open office calc) files with spreadsheet sdk in VB.NET and ByteScout Data Extraction Suite

How to write a robust code in VB.NET to read ods (open office calc) files with spreadsheet sdk with this step-by-step tutorial

These sample source codes on this page below are displaying how to read ods (open office calc) files with spreadsheet sdk in VB.NET. ByteScout Data Extraction Suite is the bundle that includes three SDK tools for data extraction from PDF, scans, images and from spreadsheets: PDF Extractor SDK, Data Extraction SDK, Barcode Reader SDK and you can use it to read ods (open office calc) files with spreadsheet sdk with VB.NET.

Want to quickly learn? This fast application programming interfaces of ByteScout Data Extraction Suite for VB.NET plus the guidelines and the code below will help you quickly learn how to read ods (open office calc) files with spreadsheet sdk. IF you want to implement the functionality, just copy and paste this code for VB.NET below into your code editor with your app, compile and run your application. Further improvement of the code will make it more robust.

The trial version of ByteScout Data Extraction Suite can be downloaded for free from our website. It also includes source code samples for VB.NET and other programming languages.

Source Code Files:

## Module1.vb

```
Imports Bytescout.Spreadsheet
Imports System.IO

Module Module1

    Sub Main()
        ' Create new Spreadsheet
        Dim document As New Spreadsheet()
        document.LoadFromFile("Hello_world.ods")

        ' Get worksheet
        Dim worksheet As Worksheet = document.Workbook.Worksheets.ByName("Sheet1")

        ' Read cell value
        Console.WriteLine("Cell (0,0) value: {0}", worksheet.Cell(0, 0).Value)

        ' Write message
        Console.Write("Press any key to continue...")

        ' Wait user input
        Console.ReadKey()
    End Sub

End Module
```
